DAMAGE EXPLANATORY SHEET

Damage is classified in three types: damage demanding the “replacement” of the damaged part, damage caused by “dent”, damage caused by “scratch”. In turn, the damage caused by “dent” and by “scratch” are divided between small and serious. This last classification is made on the basis of the damage extent which will be checked upon check in, along with the customer, by the appropriate measuring tool called “WAYCAR Damage Indicator” whose dimensions are 10 x 5 centimeters.

Here below a detailed classification:

- **Small scratch**, a single scratch (or a single scratched area) found on the involved part (front door, for example), whose extent does not exceed the “WAYCAR Damage Indicator” size;
- **Serious scratch**, a single scratch (or a single scratched area) found on the involved part (front door, for example), whose extent exceeds the “WAYCAR Damage Indicator” size. Moreover, several small scratches found on the same part (front door, for example) fall within this damage category;
- **Small dent**, a deformation whose extent does not exceed the “WAYCAR Damage Indicator” size;
- **Serious dent**, a deformation whose extent exceeds the “WAYCAR Damage Indicator” size; but does not exceed the extent of 30 x 30 centimeters. Moreover, several small dents on the same part (front door, for example) as well as a single serious dent plus several small dents on the same part fall within this category;
- **Replacement because of a broken or missing part**: all damage consisting in the break, in the part being compromised and/or one or more parts of the vehicle missing, at such an extent demanding the replacement of the involved part. All single deformations whose size exceeds 30 x 30 centimeters compromising a portion of the involved part as well as several serious deformations fall within this category.

The Damage Sheet displays the amounts for each car group, VAT excluded, due by the liable customer in compensation of the caused damage. These amounts are determined according to the type of damage and (in the event of a dent or scratch) also depending on its classification as small or serious.

These fixed amounts are determined on the basis of the Car Manufacturers’ price list and also include the labor costs consumer products, garbage disposal and technical non-use of the vehicle relating to the time necessary for the repair and the spare parts retrieval.

The “Damage Sheet” does not include any mechanical damage – such as those occurred to the underside of the vehicle, the front and rear suspensions, the engine and its functional accessories (radiator, condenser, intercooler and so on) which obviously can be verified only by competent experts. Such damage will be verified and quantified after the check in of vehicle by experts appointed by WAYCAR S r l also through commercial agreements with Companies operating in the damage report sector.

Moreover, the following damage is subject to verification and quantification by damage report:

- ✓ The serious deformations / damage to the body involving the inner metal parts and the vehicle frame;
- ✓ Damage arising from wrong refueling or inflow of unclean fuel;
- ✓ Damage arising from fuel freezing caused by the customer’s negligence;
- ✓ Damage to the trim, the inner upholstery, the functional and decoration accessories of the cabin, the inner molding of the cabin, the inner upholstery of the roof, the dashboard upholstery and accessories, all indicators / gauges of the dashboard;
- ✓ All damage not specified on the Damage Sheet.

It is then underlined that for all damage which (due to their type and features) cannot be immediately verified and quantified by fixed amounts, a damage report issued by registered experts will be used for their quantification as well as estimates by qualified mechanics. All such damage is not included in the Damages Sheet.
